

HD34 / FD34 Square Truss

Square Trussing with a square profile geometry for larger loads.

Square Trussing for Heavy loads

HD34 / FD34 SQUARE TRUSS

HD34 / FD34 with excellent load capacity on free spans of 18m / 16m or to be used as tower elements:

HD34 / FD34 straight elements lend themselves to use as span exposed to bending stress resistant span up to 18m / 16m or as standard tower element.

HD34 using the 3mm wall thickness assures durability and extra strength. Desi-

gned for high frequency usage or installations, which demands higher loading.

Ideal trussing system for rental, touring and exhibition companies.

Made with the fast connection system and approved according the DIN 4113 specifications by the TUV.

Dimensions HD34 / FD34

HD34 TRUSS

FACTS

- Increased wall thickness of 3mm for 50mm main tubes
- Increased loading compared to FD34 (up to 50%)
- Also usable as HD34 Tower Truss
- TuV approved

FD34 TRUSS

FACTS

- Tolerance free conical connector
- Wall thickness of 2mm for 50mm main tubes
- Also available in any non-standard length and shape
- TuV approved

Measurements: HD34 FD34 Loadcases HD34

HD34 / FD34 Square Truss

Example of a one level and a two level construction

HD34 / FD34

CORNER

These elements allow constructions in up to three levels, thus permitting almost limitless possibilities for the realization of creative ideas.

To avoid various corner problems or increasing strength in the corner parts, the universal cornerblock with bold on receivers in various lengths is the answer.

In the cornerblock as well as in the bold on receivers a small hole is drilled to match a spring pin so the position is determined. Easy to connect, safe and fully locked.

Complementary accessories and the article codes of the HD34 System can be found at the page 166. For FD34 System look at page 168.
