

Platforms

The frame of a **nivtec stage deck** consists of specially designed aluminium profiles (groove and tongue) with integral locking mechanism and four special leg supports. No tools or accessories are required for **assembly of a nivtec mobile stage**.

The strong and safe bond of the **stage decks** creates a **completely plane stage surface** without trip hazards - a **cutting-edge technology** for building stages with **high structural stability**. Various **platform surfaces** are available upon request.

Compliance with safety regulations and standards according to **DIN EN 13814** is monitored by **TÜV Thüringen e.V.**, independent testing institute for demountable structures.

system platform - in- + outdoor

aluminium frame

- groove and tongue profile
- multiplex plywood panel, dark brown, thickness 12 cm
- weather resistant gluing
- during outdoor use to be protected from extreme weather influences – natural product: wood
- stacking height 9 cm
- load capacity 7,5 kN/sqm
